Hundreds of students are commuting to and from college with their own vehicles every day. Due to the parking of the said vehicle in the wrong place or in the wrong manner, there is a problem of parking area and most of the students do not keep the vehicle documents with them while driving. In this regard, the students should be disciplined and the parking system in the college should be maintained properly, Greenfinch Digital Business Solutions Pvt. Ltd. has launched the "Apna Vahan Card" (AI Based) project.

This project helps in streamlining the vehicle parking system as well as managing vehicle related documents and is a very effective medium for immediate communication with student's parents in emergency situations (in or outside the college Campus).
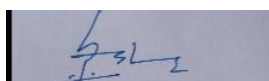

No matter where the vehicle is parked, the owner/driver of the vehicle can be contacted by scanning the QR sticker attached to the vehicle on a mobile phone, thus solving the traffic problem caused by wrong parking by calling the contact as well as updating information of vehicle documents (such as PUC, registration certificate, insurance, driving license etc.) by communicating to the owner through SMS.

In case of any accident or alike situation with the concerned vehicle, the immediate communication can be done to nearest relatives by meant of the contact number located with QR Sticker.

For more information about the "Apna Vahan Card" (AI Based) project, information sheet is attached.

We are looking forward to get support or proper guidance from you to implement the said project in your colleges.

Thanks

Mr Subhash Bhute- 9834309516/9545541589
