## **Company Profile**

Greenfinch Digital, is the firm behind the QR code based Digital ID Card (My Id Card app & myidcard.store web back end ) Development and Management . Corporate office is located in Pune, India. The company is a recognized leader in software development and implementation with new technology. Greenfinch Digital is one of the first companies to introduce app and web-based products My Digital Id Card for educational Institute, Schools, Colleges, Universities and Corporate sector.

Today My Digital Id card has 50,000 + customers all over the world. The My Id Card app has been the subject of numerous local and national media stories as an important and well-received part of corporate & education Digital ID card initiatives.

The following are additional important points about Greenfinch Digital approach to its customers:

Commitment to Technical Support – Consistently displaces competing products due to an inability on the part of the customer to reach competitor’s tech support in a timely manner. We dedicated to providing live technician support from 10am to 6pm on working days and maintains a full array of web-based support options that area available 24/7/365.

A Commitment to Research & Development – Dedicates a great deal of time and resources to ongoing research, design and development. My Id Card app releases new features every two months and is constantly adding features that are available at no additional charge to its customers.

## **Our initiative for new Technology id Card**

Educational institution is a vast sector and it is expanding rapidly. With the rapid growth of technologies, educational institutions are still lagging behind. For identification of students, they still lie on manual handwritten ID card and files. If proper ID card system is introduced then it would be much easier to identify a student and can track his/her progress. Therefore, in this research we implemented advanced using of QR code and student ID generation. We tried level best to make right implementation of QR code with student ID card.

Automated student ID had image capturing facility and requirements of an ID and there is no need of hand written ID card. QR code is attached into ID card and student personal details can be found by scanning the QR code with smart phones (downloaded & installed QR reader software). QR code is said to be the next generation of bar code and using QR code with ID card brought positive outcomes. While using software tools, identity cards works fine and suitable for an educational institution as it is free. Thus, ID card will be a perfect use of modern technology in developing countries.

### **Digital ID card Systems are perfect for:**

- Student, faculty and staff photo ID badges
- School visitor ID badges
- Access control
- Registration processes and record keeping
- Meal plan programs
- Library checkout processes
- Equipment checkout
- Activity and event access
- Fundraising activities
- Exam Hall Ticket
- Entry Ticket
- Vehicle Pass (Sticker)
